DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed August 20, 2004 have been fully considered but they are not persuasive.

Examiner respectfully disagrees with the Applicant's assertion that Shahidi does not teach use of constant DC magnetic field in the navigation environment. The MRI system used in Shahidi has constant DC magnetic field. In addition, Shahidi clearly anticipates optical tracking system where the optical sensors 106, 107, 108 tracks the surgical instrument 109. Furthermore, Shahidi discloses computer memory with software means for operating and controlling the position tracking system where the computer is coupled with display 102 to provide medium for image feedback and user input (col. 6, lines 22-34). The rejection from the previous Office Action dated May 20, 2004 is repeated below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 3737

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 18-24 are rejected under 35 U.S.C. 102(e) as being anticipated by *Shahidi* (US 6,167,296).

Shahidi anticipates all claimed features in claims 18 and 20-24. Shahidi disclose a volumetric image navigation to assist surgical procedure by tracking surgical device. Specifically, in figure 1-3, 6, and 8, Shahidi illustrates a navigation system including an image database 301 receive and load images of patient from image acquisition system such as MRI, CT, Pet, etc., computer with a monitor 201 and 102, for displaying image data, tracking device 402, 502 with constant DC magnetic field from MRI, a pointer 113 navigation instrument with aforementioned magnetic field detecting position associated with the pointer navigation instrument, which is directly linked with image update 407 from the image tracking, means for extracting anatomical features (segmentation unit 615 in figure 6), and menu-guided control of the system to control the tracking of the pointer navigation instrument (col. 5, line 30 – col. 7, line 65; col. 8, line 18 – col. 9, line 50).

Claim 19: Shahidi illustrates in figure 9-14 where the CT or MRI system is used to tracking navigation instrument to provide pre-operation image data from a craniotomy.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3737

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
